Subject: Follow-Up on Severe Allergy Testing Panel Results

Dear [Patient Name],

We have received the results of your recent allergy testing panel. The tests indicate significant reactions to the following allergens:

- [Allergen 1]: [Severity Level]
- [Allergen 2]: [Severity Level]
- [Allergen 3]: [Severity Level]

Based on these results, you are at risk for a severe allergic reaction (anaphylaxis). It is critical that you review the attached management plan and schedule a follow-up appointment immediately to discuss your treatment strategy.

Action Items:

- Review the list of identified allergens and begin avoidance measures.
- Keep an Epinephrine Auto-Injector (EpiPen) with you at all times if previously prescribed.
- Schedule a follow-up consultation by calling [Phone Number].

During our next appointment, we will discuss long-term management, emergency protocols, and potential immunotherapy options.

Sincerely,

[Doctor Signature]
