Subject: Confirmation of Cloud Security Liability Coverage - Policy #[Policy Number]

To Whom It May Concern,

This letter serves as a formal request to verify the specific terms and limits of our Cloud Security Liability Insurance under the aforementioned policy. As our organization scales its cloud-native infrastructure, we require written confirmation regarding our coverage for the following areas:

- **Data Breach Liability:** Coverage for unauthorized access to sensitive data stored on third-party cloud platforms (AWS, Azure, Google Cloud).
- **Regulatory Fines and Penalties:** Coverage for costs associated with GDPR, CCPA, or HIPAA violations resulting from a cloud security failure.
- **Cyber Extortion and Ransomware:** Coverage for ransom demands and mitigation services related to cloud-based assets.
- **Business Interruption:** Compensation for loss of revenue resulting from a security breach or service outage at our cloud provider.
- **Third-Party Liability:** Protection against claims of negligence regarding our management of cloud security configurations.

Please provide a summary of the current coverage limits, deductibles, and any specific exclusions related to multi-cloud environments or shared responsibility models. Additionally, please confirm if our current security certifications (e.g., SOC2, ISO 27001) influence our premium or coverage eligibility.

We look forward to receiving this documentation by [Requested Date]. Should you require further information regarding our cloud architecture or security protocols, please contact me directly at [Phone Number] or [Email Address].

Sincerely,

[Signature]
